## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 2 (line 2), and claim 5 (line 2) recite the limitation "Brookfield viscosity". There is insufficient antecedent basis for this limitation in the claim. Claim 1 is claiming a powder. Since claim 1 is silent on any liquid medium, there is insufficient antecedent basis for a viscosity.

### ***Allowances***

4. Claims 1, 6-12 are allowed. Claims 2-5 would be allowable if the 112 rejection set forth is overcome.

5. The following is an examiner's statement of reasons for allowance:

As of the date of this office action, the examiner has not located or identified any reference that can be used singularly or in combination with another reference including

the closest prior art of Luker (US 5023388) to render the present invention anticipated or obvious to one of ordinary skill in the art.

Luker (col. 1, line 42-52) disclose polyethylene waxes and their molecular weights. However, Luker is silent on a microfine polyethylene powder comprised of particles which are spherical or substantially spherical in shape and having an average particle size from 1 to 5 microns and wherein 80 percent or more of the particles range in size from 0.1 to 7 microns, said polyethylene powder having a weight average molecular weight from 20,000 to 55,000 g/mol and density from 0.895 to 0.925 g/cm<sup>3</sup> as claimed.
